

Red Engine Consulting Service Portfolio

Red Engine Consulting has designed a full portfolio of Simple. Practical. Effective.[®] best practice IT Service Management and Project Management solutions for small and medium sized organizations.

Red Engine Consulting offers low cost IT Service Management & Project Management consulting alternatives specifically designed to help small organizations get the value out of ITIL, Project Management and other industry best practice, methodologies and frame works.

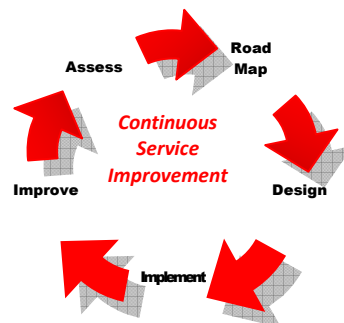

Typically, both the Project Management and ITIL service areas have been the exclusive domain of the large consulting firms. The emergence of Red Engine Consulting, a small and independently owned consulting firm, allows smaller organizations the opportunity to take advantage of industry best practices at a fraction of the cost usually charged by the large consulting firms.

The REC difference is in our ability to focus on the delivery of the same high quality solutions sought by larger companies, but designed to fit the specific needs and budgets of Small Businesses.

It is the extensive knowledge and experience of our ITIL and PMP certified specialists in Service Management consulting, support, and education that allow Red Engine Consulting to deliver the best overall value to your organization.

The Red Engine Consulting service portfolio includes end-to-end consulting services, based upon the established guidelines of many industry best practice and quality frameworks, including ITIL, COBIT, Six Sigma and PMBOK.

Our service portfolio grew out of a desire on the part of Red Engine Consulting leadership to create a bundle of low cost service options that allow small to medium sized businesses to take advantage of industry best practices in the fields of IT Service Management, Project Management, IT Governance and Contract Management.

It includes the full suite of end to end ITSM solutions such as [Process Maturity Assessments](#), [Process Design](#) and [Process Implementation](#). Our experienced consultants work hand-in-hand with your organization to guide you every step of the way. Our ultimate objective is to teach your internal staff to become the ITIL and Project Management experts for your organization.

As an added cost saving measure, many of our IT Service Management solutions can be delivered either remotely, on-site or a combination of both.

For a full menu of our low cost Service Management solutions for Small Business, visit our website or contact us via email at:
